1. The following is an examiner's statement of reasons for allowance: The limitations of the claims, including the structural limitations and the requirement for the use of a green sensitive fulgide with low thermal sensitivity as a photochromic material. While it might be arguable that Hohenacker et al. leads toward a mixture of photosensitive materials to span the visible spectrum, at least one of which being green sensitive, there is no direction in the prior art of record concerning a preference for fulgides as the green sensitive photochromic material, particularly those which are temperature insensitive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Faruqi et al. '432 teach Aberchrome 670 (including its chemical name) used in holographic recording, which is considered non-analogous.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J Angebrannt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
